

TURNOUT GEAR TUMBLE DRYER – 51 LBS / 12 PIECES

Capacity (lbs/pieces)	51/12
Door Diameter (in)	22.6
Door to Floor (in)	29
Drum Depth (in)	31.4
Drum Volume (ft ³)	16.2
Electrical Configuration	120v / 1Phase / N 20amp
Gas Inlet (bsp)	1/2
Exhaust	8
Max Airflow (cfm)	706
Dimensions (wxdxh in inches)	35x49x67
Weight (lbs)	462

This 51-lb Tumble Dryer is ideal for centralized drying of multiple stations at one location. This machine operates with the use of both electric and gas, drying more gear in a small footprint. Arriving pre-programmed to provide ISP-capacity drying, its pre-programmed cycles within the dryer ensures that your gear is thoroughly dried, reducing the risk of mold, mildew and bacterial growth. Loading and unloading your gear has never been easier. The tumble dryer's door features a wide 180-degree opening, ensuring convenient access and maneuverability with minimal effort. Circul-Air tumble dryers are full NFPA-1851 2020 edition compliant, which ensures your gear will be dried safely and in a timely fashion.

- Commercial grade construction for long-lasting durability to dry gear for years to come
- Three Pre-Programmed Cycles:
 1. No Heat: Ideal for situations where gentle drying is preferred.
 2. Low Heat: A moderate heat setting for a balanced drying process.
 3. Max Compliant Heat: This setting adheres to the highest of compliant standards.
- Dries up to 12 pieces of gear
- Optimal for ISPs or stations in dryer climates with high gear needs
- 1-year warranty
